

## *mbl 116F - a new dimension of listening ...*

With a passion for detail, we have now invented the mbl 116 by integrating the latest experiences gained from the further development of the revolutionary Radialstrahler technology.

The result is the new mbl 116F, whose relationship to its big brother mbl 111F cannot be denied when considering technology and appearance: A 4-way system,

in which tweeter and mid-range are covered by two ultra-precise Radialstrahler that create the legendary three-dimensional sound field.

Two long through woofer for a powerful base and two ridged low mid-driver for uncolored midrange reproduction, create a surprisingly powerful and fast bass for this size of speaker.

The cabinet used for the speaker – which is handcrafted with most precious materials in our factory in Berlin – features a completely new design and optimized sound.

Every single detail on this Radialstrahler is perfect – from the phenomenal acoustic to the design, which gives you the option to choose between luxurious piano finish in black or white and silver.

Woofer	push-push 2 x 200 mm, 8" Alu
Low Midrange Driver	push-push 2 x 140 mm, 5.5" Alu
Midrange	Radial MT50, CFK (MBL)
Tweeter	Radial HT37, CFK (MBL)
Acoustic Center	42 inch
Weight	88 lbs
Dimensions (WxDxH)	11.8 x 18.1 x 44.5 inch
