PRESS RELEASE

APRIL 2021

DIGITAL SHARING CONVERTER = NEW DAC + STREAMER + DIGITAL PRE-AMP

Why do few when you can do more? This is the anthem at Métronome with the new DSC, member of the Digital Sharing family. Except the famous piano-like front plate characteristic of the range, everything is new inside, resulting in a very high-end digital source meeting the highest requirements of the actual market.

At Métronome's, Digital Sharing stands for streaming. But with this new DSC, the offer is much more complete: a high-end D/A converter, including streaming and network playing functionality, added with a patented digital volume control which makes it a performant pre-amplifier. The DSC is housed into a full aluminum chassis, opening at the front with a 5 inches touchscreen like on almost all Métronome devices since a couple of years. The DAC will decode as well PCM files, and DSD up to 512, while the new streaming board accepts all types of audio files up to DSD256.

The DSC can be managed with any DLNA/UPnP apps, but is particularly adapted to the reliable mConnect control, which embeds the main audiophile streaming services as Qobuz, Tidal, Spotify, Deezer, and vTuner for internet radios.

The digital pre-amp results from a partnership with Leedh Processing, and is fully lossless, only modifying the signal amplitude without any further changes.

DSC also integrates a new luminous touchscreen, giving a brilliant access to all the settings of the device.

DSC, Retail Price: 24,990.00 euros
Available in Silver and Black finishes

Jean Marie Clauzel, Owner and Designer of Metronome Technologie, precises: "Our Digital Sharing range has grown in popularity, showing that our choice to move the company to streaming was the right one. Plug-and-play, easy to use and stable, this is what we want with all our products, but as everyone knows the famous Métronome sound will always remain our first priority!"

TECHNICAL SPECIFICATIONS OF DSC

- Streaming services: **Tidal, Qobuz, Spotify, Deezer, vTuner, Roon Ready**
- Network protocols: **DLNA, UPnP**
- Digital pre-amplifier: **Leedh Processing**
- Resolution: **32 bits / 384 kHz, DSD 512,**
- D/A conversion: **ES9038PRO**
- Digital inputs: **USB, Optical, SPDIF, AES EBU**
- Analog outputs: **Unbalanced @0dB 100 Ohms, RCA connectors**
Balanced @0dB 2 kOhms, XLR connectors
- Power supply: **3 toroidal transformers with Schaffner filters, 14 independent regulation lines**
Voltages: 100 – 120/240 V – 50/60 Hz
- Accessories: **Métronome remote**
- Other characteristics: **Consumption: 25 VA**
- Dimensions (LxHxP): **430 x 105 x 430 mm** Weight: **17 Kg**
- Finishes : **Black or Silver**

About Metronome Technologie:

Métronome is a French high-end audio manufacturer. Our aim is to offer audio enthusiasts a universe where the sound is king, where it is real. Designed and hand-made in France, our products will satisfy most discerning music lovers with incredible technical performances and quality of sound, approved by international reviewers.
