

TAD

REFERENCE SERIES

NEW

LIMITED EDITION

The “Limited edition” is joining to our collection

The special limited edition, where beauty meets superior sound

Since its inception, the TAD Reference One has become the established reference for speaker systems in the new era of high definition audio. It employs carefully selected materials and parts, benefits from relentless attention to detail and engineering, and is backed by our unmatched design theory and testing ability, and has been acclaimed by numerous professionals and audiophiles worldwide.

On this occasion, we are pleased to announce that a limited edition of Reference One is joining to our collection only 25 pairs worldwide. To gain specialty status in both esthetics and sound quality, TAD-R1TXLTD comes in an upgraded sturdier enclosure. It has been further enhanced in stability by adding an aluminum base, and spikes and spike holders have also been newly designed. This helps to deliver more powerful bass, more condensed, and energetic audio reproduction with spatial nuance of the music retained intact. It is not only the sound that is special. A deep and elegant “Santa Maria aquamarine” special finish and “Aurelia Gold” accent color combine to bring a sophisticated and elegant touch to the living space.

We cordially invite you to bring this work, full of TAD's sound philosophy, to your listening enjoyment.

Specifications

- **Accessories exclusively provided to the TAD-R1TXLTD:** Cone-shaped spike x 6, Spike holder x 6 (Coming in a single pack for a pair of speakers)

Artisan's Pride of Work

Artisan's Pride of Work

Extraordinary engineering and materials are shaped into masterpieces by the finest artisans. Every TAD product is hand-assembled by certified artisans with exceptional expertise and skills on our lines in Japan. They assemble drivers that require micron-level precision and other parts into TAD speakers.

Furthermore, the enclosures for the Reference Series speakers were collaborated with Tendo Mokko, one of the most prominent manufacturers of luxury furniture in Japan. Their works is crafted based on traditional craftsmanship techniques and design principles, reflecting Japan's aesthetic sense and functionality. They conduct fastidious quality control from material selection to the manufacturing process, combining meticulous handcraftsmanship with the latest technology to create their works. Their skilled artisanship is also incorporated into the TAD-R1TXLTD, and the special “Santa Maria aquamarine” color that accentuates a quasi-three-dimensional elegance of the wood grain enhances the esthetic beauty of this craftwork.
